New Old-but-Gold Switches

IO SERIES

IO SERIES

TIS
CONTROL EVERYTHING

When it comes to home automation, multi-functional switches should be high on your list, as they not only make your house more convenient but also safer. **TIS Automation Group** has launched a new line of wall switches with integrated capabilities for managing lights, temperature, moods, etc. Among them is the wall-mounted **IO Series**, which is suitable for home and hotel room installation.

This keypad-equipped series lets you control an entire house quite easily, whether you are at the office, on vacation, or in bed for the night. We recommend the TIS IO series because it has a nice design and is easy to use and compatible with any lighting load. This panel lets you convert your room to a smart space while still allowing you to control it the old-fashioned way if you want.
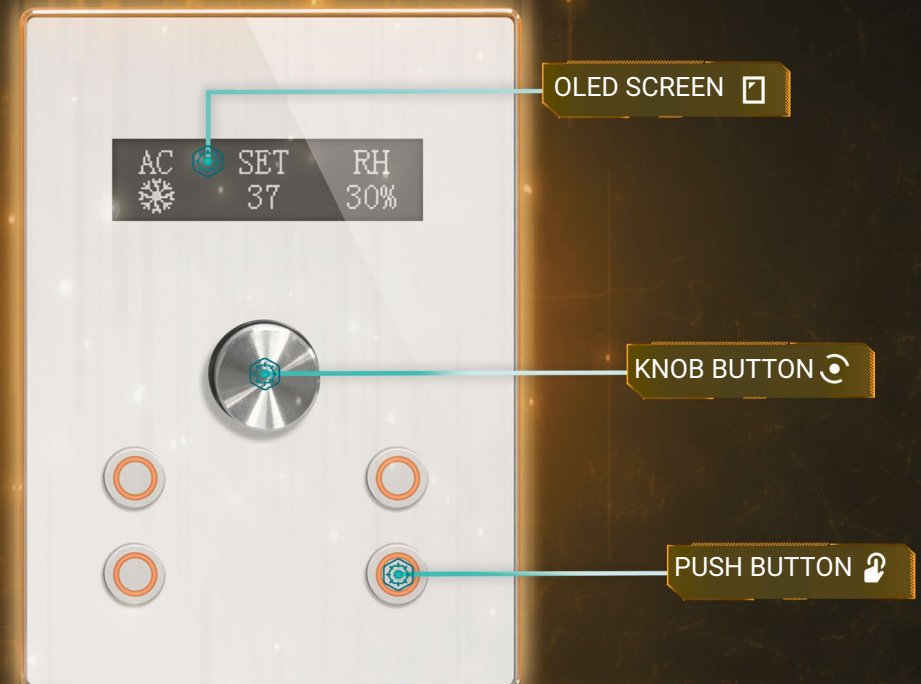

To put it briefly, if you are looking for a house where curtains are closed when the sunlight is at its peak, lights are out when you leave the bedroom, and the AC freshens the air when it is hazy outside, you should choose TIS IO switches.

Now, let's see what comes with this smart package:

IO Thermostat with 4 Gang:

This is a wall thermostat with on OLED screen and a rotating knob for managing room temperature, fan speed, and floor heating. It also allows for lights, moods, and shade control through four push buttons.

IO 8G:

This product can be mounted horizontally or vertically in any hotel or residential project for the ultimate control over lights, moods, climate, etc.

IO Outdoor Hotel Panel:

You can level up your hotel rooms with this solution featuring MUR/DND buttons and room number display. If you program it, guests can use its RF readers and access control functions, too.

IO CARD SWITCH

If you want to impress your guests, let them enjoy this user-friendly and catchy panel. This hotel RF-enabled card switch comes with three buttons for DND/MUR/Laundry services and features memory to save for user/room service logs. Therefore, hotel management is optimized without having to compromise guests' comfort. With TIS innovation, everyone has what he or she needs in the shortest time possible.

The common benefits among all the components of the IO series are increased safety and improved BMS. They also save you a lot of money, but that is not all. These solutions are built to enable interior designers to achieve outstanding design results. With a unique curved interface and finish, this series of wall panels stands out in a good way. They are fully customizable, allowing for many options.
