Introduction

Upgrade your hotels security and guest experience with TIS Smart Hotel Access Solutions. Designed specifically for the hospitality industry, this comprehensive system includes advanced smart locks, card encoder, access control panels, and App access features—all working together to provide secure, efficient, and seamless entry for both guests and staff.

www.tiscontrol.com

TIS Hotel Access Solutions support two access methods, including RFID cards and passcodes. In addition, they are integrated with Opera PMS, ensuring centralized, real-time management of guest access and room assignments. From check-in to check-out, TIS simplifies operations, reduces manual tasks, and enhances the overall guest journey.
