# **INSTALLATION MANUAL**

Model: ADS-2R-2Z, ADS-3R-3Z

### **Read Instructions**

We recommend that you read this Instruction Manual before installation.

### **Mounting Location**

Install in a dry, indoor area with a suitable temperature and humidity range.

## Safety instructions

Electrical equipment should only be installed and fitted by electrically skilled persons.

Failure to observe the instructions may cause damage to the device and other hazards.

These instructions are an integral part of the product and must remain with the end customer.

### **Electrical Wires**

The recommended wire size for light channels is 2.5mm, for the Line, Neutral, and Load cables. The installer should consider the total current consumption when selecting the wires.

### Warranty

There is a two-year warranty provided by law. The hologram warranty seal and product serial number are available on each device.

courses.

Programming

This device can be tested and programmed manually. Advanced programming requires knowledge of the TIS Device Search software and instruction in the TIS advanced training

## **Simple Installation**

it fits on most junction box sizes or can be located anywhere.

SA, AUSTRALIA

Wanchai, Hong Kong

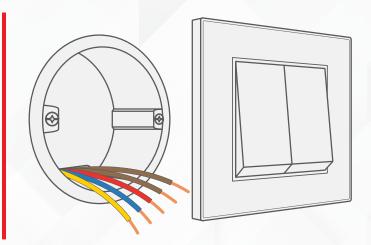

**1** Turn off the power at the main circuit breaker to turn off voltage supply to the switch.

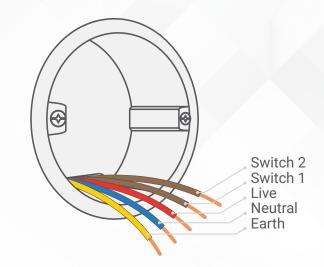

2>> Remove the switch cover. Unscrew and pull the wall switch out. Take the wires out of the load and line.

Find a total of 3-5 wires (3 wires if 1

channel, 4 wires if 2 channels, 5 wires if

3>>

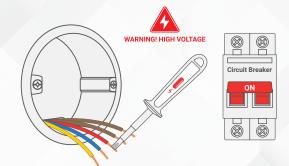

3 channels).

**4** Turn on the power at the main power breaker, and carefully identify the live wire using a voltage tester, and find the neutral wire.

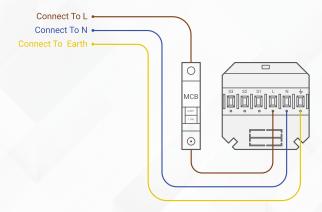

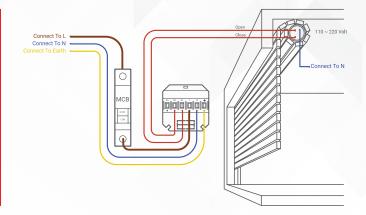

Turn off the main power breaker.

Attach the switch1, 2, & 3 wires to the S1, S2, & S3 terminals, respectively.

## SERVER LINKING

In order for a project to be fully linked to the TIS server, server configuration must be enabled in just 1 product within that project.

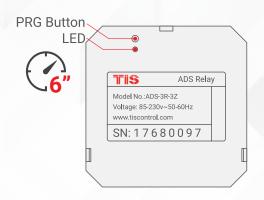

If you have already done that with any other panel, just ignore these steps and proceed to configuration steps.

To do the server linking, complete the following steps:

In the TIS App, go to Settings ► Connect Server, and follow the steps by entering your SSID password.

On the module, press and hold the PRG button for 6 seconds. The PRG LED will start blinking.

TIS CONTROL PTY LIMITI SA , AUSTRALIA TIS CONTROL LIMITED Wanchai, Hong Kong

## **C** SERVER LINKING

On the TIS app, press Search and wait for a few seconds. The panel will link to your Wi-Fi, and the PRG button will turn blue.

4>>

Select your server option and 4-digit password. Then, press Save.

## **PAIRING** (MANUAL PROGRAMMING)

**4** The same procedure must be followed to program other relay channels. The only exception is that you must press the PRG button six and seven times for channels 2 and 3 accordingly. The following table displays method info in detail.

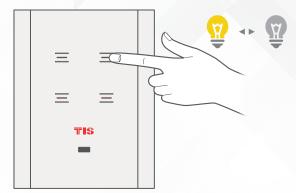

METHOD	RESPONSE
Channel 1: 5 Short presses on the PRG button	PRG LED blinks once every 2 seconds
Channel 2: 6 Short presses on the PRG button	PRG LED blinks twice every 2 seconds
Channel 3: 7 Short presses on the PRG button	PRG LED blinks three times every 2 seconds

## **?** USER OPERATION

Use your mobile app or smart wall switches to control lights ON/OFF.

Notice: Wall switches need to be configured with this module's dry inputs beforehand.

## TROUBLESHOOTING

	PRG button blinks purple color rapidly	<b>Reason:</b> The panel address conflicts with another device in the TIS network. You need to press and hold the PRG button for 6 seconds so that the module can get a new address.
	Device's PRG LED is RED	<b>Reason:</b> The device is not connected to Wi-Fi.
0	Device can't link to Wi-Fi router	<ul><li>Reason 1: The device is too far from the WiFi router.</li><li>Reason 2: The SSID or password is not correct.</li><li>Reason 3: Some setting in the WIFI router is preventing new devices from being added.</li></ul>
	Other wall panels can't pair with the device	<ul><li>Reason 1: Other panel connections are not linked to the same Wi-Fi network.</li><li>Reason 2: The manual programming function is disabled in the device (default is enabled).</li></ul>
	Other wall panels can't control the device channels	<ul><li><b>Reason 1:</b> Other panel connections are not linked to the same Wi-Fi network.</li><li><b>Reason 2:</b> The programming address is wrong.</li></ul>
