INSTALLATION MANUAL AIR ADS RGBW CONTROLLER

CE 🐵

Voltage:85-230v~50-60Hz www.tissmarthome.com

SN:00000000

Model: ADS-4CH-0-10V

PRODUCT INFORMATION

This product is WiFi-operated controller module designed to convert a traditional light or curtain switch into a smart one with the capability for remote control.

	PRODUCT SPECIFICATIONS			
÷	Input	Input voltage	12-32 V DC	
Ţ	Output	Number of channels Voltage	4 0-10V for signal dimming	
TISÂÎR	TIS AIR	WIFI signal Protocol standard	2.4 GHz 802.11 b/g/n	
$\langle \cdot \rangle$	Reaction time		approx. 30ms	
ţ0	Mounting	Free locate	Can be installed anywhere	
†‡†	Operation	Digital inputs TIS AIR PRG button with LED Upgrading	4 dry inputs for control TIS protocol messages & commands For programming Over WIFI connection	
Ŧ	Dimensions	(Width \times Length \times Height)	35mm × 50mm × 50mm	
	Housing	Materials Internal parts color IP rating	Fireproof PC White IP 50

INSTALLATION MANUAL

Model: ADS-4CH-0-10V

Read Instructions

We recommend that you read this Instruction Manual before installation.

Mounting Location

Install in a dry, indoor area with a suitable temperature and humidity range.

Safety instructions

Electrical equipment should only be installed and fitted by electrically skilled persons.

Failure to observe the instructions may cause damage to the device and other hazards.

These instructions are an integral part of the product and must remain with the end customer.

Warranty

There is a two-year warranty provided by law. The hologram warranty seal and product serial number are available on each device.

Programming

This device can be tested and programmed manually. Advanced programming requires knowledge of the TIS Device Search software and instruction in the TIS advanced training courses.

Simple Installation

it fits on most junction box sizes or can be located anywhere.

SERVER LINKING

In order for a project to be fully linked to the TIS server, server configuration must be enabled in just 1 product within that project.

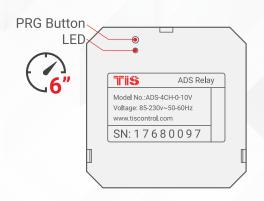

If you have already done that with any other panel, just ignore these steps and proceed to configuration steps.

To do the server linking, complete the following steps:

1 ➤ In the TIS App, go to Settings ► Connect Server, and follow the steps by entering your SSID password.

2>> On the module, press and hold the PRG button for 6 seconds. The PRG LED will start blinking.

C SERVER LINKING

On the TIS app, press Search and wait for a few seconds. The panel will link to your Wi-Fi, and the PRG button will turn blue.

4>>

Select your server option and 4-digit password. Then, press Save.

PAIRING (MANUAL PROGRAMMING)

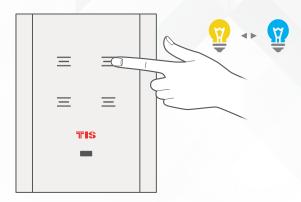

4 The same procedure must be followed to program other channels. The only exception is that you must press the PRG button six, seven, and eight times for channels 2 ,3, and 4 accordingly. The following table displays method info in detail.

METHOD	RESPONSE
Channel 1:5 Short presses on the PRG button	PRG LED blinks once every 2 seconds
Channel 2:6 Short presses on the PRG button	PRG LED blinks twice every 2 seconds
Channel 3: 7 Short presses on the PRG button	PRG LED blinks three times every 2 seconds
Channel 4:8 Short presses on the PRG button	PRG LED blinks four times every 2 seconds

? USER OPERATION

Use your mobile app or smart wall switches to control lights color.
