Read Instructions

We recommend that you read this Instruction Manual before installation.

Mounting Location

Install in a dry, indoor area with a suitable temperature and humidity range.

Safety instructions

Electrical equipment should only be installed and fitted by electrically skilled persons.

Failure to follow the instructions may cause damage to the device and other hazards.

These instructions are an integral part of the product and must remain with the end customer.

Data Cable

Use screened stranded RS485 data cable with four twisted pairs. Configure devices in a "Daisy Chain."

Do not cut or terminate live data cables.

Programming

Advanced programming requires knowledge of the TIS Device Search software and instruction in the TIS advanced training courses.

Warranty

There is a two-year warranty provided by law. The hologram warranty seal and product serial number are available on each device.

Simple Installation

You can use 2 screws to install this panel on wall; it fits on most junction box sizes.

INSTALLATION STEPS

1

Insert a large flathead screwdriver in the hole of the Panel Cover. Rotate the screwdriver 90 degrees.

2

Separate the Main Panel and Wall Base from each other.

INSTALLATION STEPS

3»

Turn off the main electrical source before installation.

WARNING! HIGH VOLTAGE

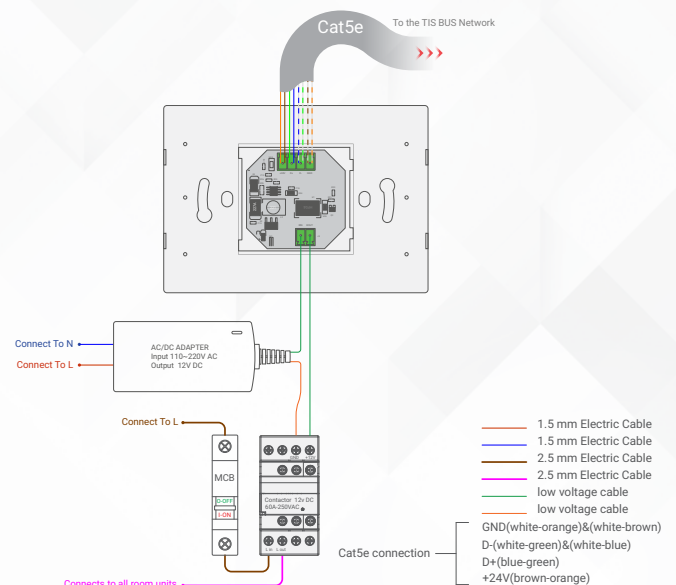

4»

Connect the Cat5e TIS BUS wire to the Panel Addition.

5»

Connect the other connection if needed between wall services switches to the digital inputs of the hotel panel as per the following diagram.

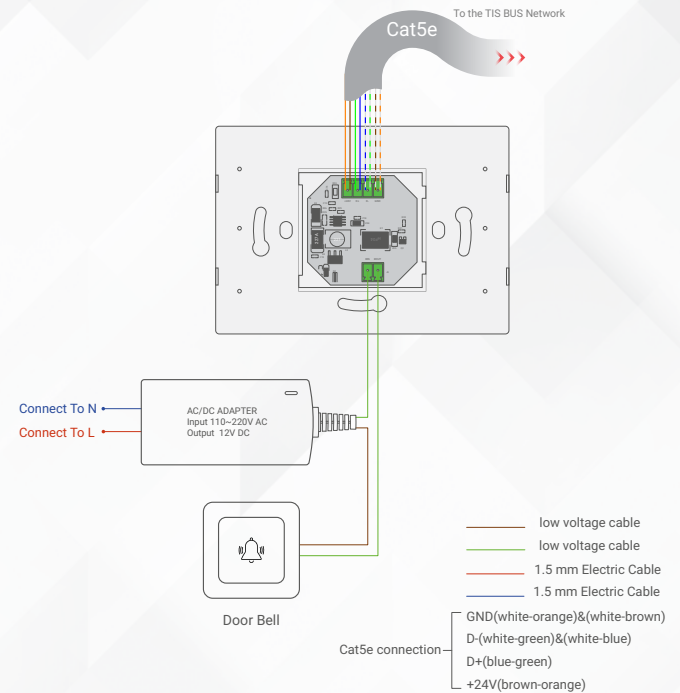

INSTALLATION STEPS

6

Connect the Door Bell to the Relay if it exists in the room.

7

Mount the wall base on the wall using 2 screws on the junction box.

INSTALLATION STEPS

8»

Connect the main Luna panel horizontally to the base installed on the wall.

install the upper part by making sure the buckles are completely inside.

9»

Turn on the power source. The panel should turn ON.

USER MANUAL

LED INDICATOR

The hotel card Led will light up if no card inserted, and will turn off if the correct card is inserted.

RF CARD POWER SWITCH

You can put your hotel card into this interface's slot to turn on the room's power, and pull it out to trigger the energy saving mode. The 10-seconds delayed power-off design of this switch maintains your comfort.

TROUBLESHOOTING

The panel buttons' LEDs do not turn ON, and the device is not powered.

Reason: The TIS 24V power supply is not connected to the TIS-BUS.

The wall panels fail to communicate with other devices.

Reason: The TIS-BUS connection has a problem, or the wire has a short.

Card inserted but the panel LED do not turn OFF.

Reason 1: Panel is programmed to accept room card only, and the card is not programmed to the same room.

Reason 2: Card's check-in date is expired.
