

INSTALLATION MANUAL

TIS RADAR SENSOR

Celling Mount Occupancy Sensor

Model: OS-MMV2-IC

PRODUCT INFORMATION

The TIS Radar Sensor is designed for applications where occupancy detection is essential. It can also be programmed to optimize energy consumption.

PRODUCT SPECIFICATIONS

	Input	Wave Radar Light intensity Temp sensor	24GHz Millimeter Wave Radar Lux meter 0-5000 Lux Resistance Temp sensor
	TIS BUS	Number of devices on 1 line Bus voltage Current consumption	Max. 64 12-32 V DC <15 mA / 24 V DC
	PIR Detection	Antenna range Antenna angle	5-6 meters (installation height 2.6 - 3 meters) 65° from the ceiling down
	Operation	Programming button Indicator LED TIS bus	For assignment of the physical address Blue or Red LED (optional) TIS Protocol massages and commands
	Functions	Movement /No Movement Logic Occupancy No Occupancy Logic Light intensity Timer	20 commands on movement action 20 commands on occupancy action 20 commands on light intensity action Timer based for saving energy
	Dimensions	Length x Width x Height	60mm x 60mm x 38mm
	Housing	Materials Casing color IP rating	ABS anti fire / PC anti fire White IP 20
	Air humidity		<85% non-condensing

BARCODE (UPC-A)

6 06795 20879 1

Read Instructions

We recommend that you read this Instruction Manual before installation.

Mounting Location

Install in a dry, indoor area with a suitable temperature and humidity range.

Safety instructions

Electrical equipment should only be installed and fitted by electrically skilled persons.

Failure to follow the instructions may cause damage to the device and other hazards.

These instructions are an integral part of the product and must remain with the end customer.

Data Cable

Use screened stranded RS485 data cable with four twisted pairs. Configure devices in a "Daisy Chain."

Do not cut or terminate live data cables.

Programming

Advanced programming requires knowledge of the TIS Device Search software and instruction in the TIS advanced training courses.

Warranty

There is a two-year warranty provided by law. The hologram warranty seal and product serial number are available on each device.

Simple Installation

You can use 2 screws to install this sensor on the ceiling.

INSTALLATION STEPS

1

Turn off the TIS power supply

WARNING! HIGH VOLTAGE

2

Create a 50mm hole in the ceiling to fit the sensor properly

3

Attach the TIS-BUS cable to the sensor, ensuring a secure connection

Cat5e connection

- GND(white-orange)&(white-brown)
- D-(white-green)&(white-blue)
- D+(blue-green)
- +24V(brown-orange)

INSTALLATION STEPS

4»

Push the mounting springs upwards with one hand and insert the mounting springs through the hole; then push the sensor until it is fitted into the ceiling

5»

Turn the power supply ON. The sensor LED should turn on

TROUBLESHOOTING

The sensor's LED blinks rapidly.

Reason: The sensor address conflicts with another device in the TIS network. You need to press and hold on the sensor PCB PRG button for 6 seconds so that the sensor can get a new address.

The sensor's LEDs do not turn ON, and the device is not powered.

Reason: The TIS 24V power supply is not connected to the TIS-BUS.

The sensor fails to control the device channels.

Reason 1: The TIS-BUS connection has a problem, or the wire has a short.

Reason 2: The programming address is faulty.

The sensor LED is always off, but it works fine.

Reason: LED is disabled in the software.

The sensor's sensitivity is not strong.

Reason 1: The sensitivity level is reduced in the software.

Reason 2: The ceiling where the sensor is installed is not high enough.
