

# INDUSTRIAL DIMMER

Conveniently set the brightness level of multiple lights using a central hub. This controller offers an industrial grade light dimming technology ideal for billboards, shopping centers, restaurants, etc.

**TIS**  
CONTROL EVERYTHING

# A LIGHT THAT NEVER GOES OUT.

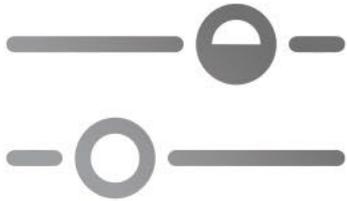

“

Managing lights in big projects and mass buildings is not easy. With a wide range of variable light voltages, it is important to have reliable and cohesive technology. The newly designed Industrial Dimmer by TIS helps to control electronic lamps and LEDs.

This dimmer switch allows users to customize the amount of lamp output for comfort and energy efficiency. No matter how many light channels there are in your project, we can help you control the level of illumination in any room.

# FLEXIBLE DIMMING

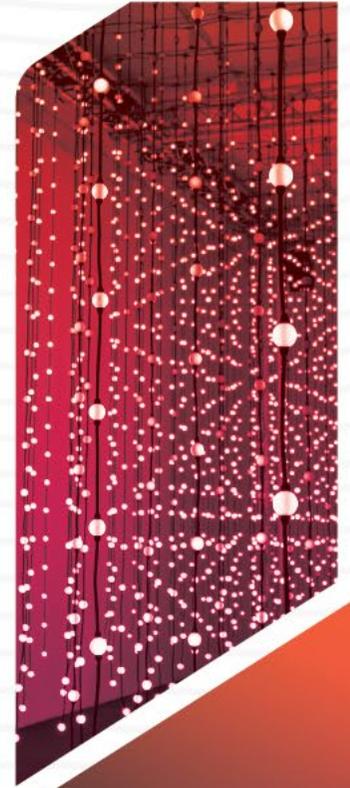

Our Industrial Dimmer offers a powerfully flexible dimming option for your property. If you own a casino, you are familiar with the importance of setting the right mood for the utmost business success.

The logo icon consists of a series of horizontal bars of varying lengths, stacked vertically, creating a stylized 'F' shape. The bars are colored in a gradient from orange at the top to red at the bottom.

# FLICKER-FREE

You can even have flicker-free light dimming harmonized with the music to make your customers feel that every moment is just the right one. With TIS, it is easy to make your casino shine.

This module is compatible with incandescent and LED lights and allows you to manage the brightness level of multiple lights directly from your phone or computer.

Whether you need to control lights from across the room or from the other side of the planet, we recommend the enduring design of the TIS Industrial Dimmer.

Hotel owners can benefit from the ease and efficiency of this solution, which makes hotel management more convenient and eco-friendlier.

With our dimming module, you know you have a proven, reliable, easy-to-use, and extensible product.

You do not have to spend valuable time looking for light switches to create a pleasant atmosphere in your restaurant.

Yes, that is right; this dimmer can be used in restaurants, too.

The technology behind this product makes  
enables it to fit easily into any commercial or  
industrial setting.

We adore this technology,  
and we think you will too.
