

— TIS TECHNOLOGY IS YOUR MAP IN THE MAZE OF LIGHTS

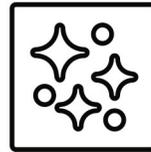

TIS has designed many solutions to make customers' lives more convenient. Some of these products are good for modernizing your residence, while others, with multiple features and functions, can automate any type of project. The **TIS 6-Channel Ballast Controller** is one of the solutions that is beneficial in all residential and commercial environments.

Our 6CH Ballast Driver helps to control 0-10V lights on all scales. Using this product, you can easily manage and dim the lights in your store and create a pleasant atmosphere to better attract customers' attention. Just install it and dim the lights in your shop window according to your preference.

Imagine how beautiful it would be to frame the walls of your house with sparkling LED lights. A bright wall with pictures of your loved ones wrapped in soothing dim lighting can make you feel closer to them, even if you are far away. That is what our ballast driver does.

We are here to help you control all of your lights with one single application on your phone and without any hassles or confusion. Let us take you to the next smart lighting level with our easy-to-use 6-Ch Ballast controller.
