

# DOOR WINDOW SENSOR

---

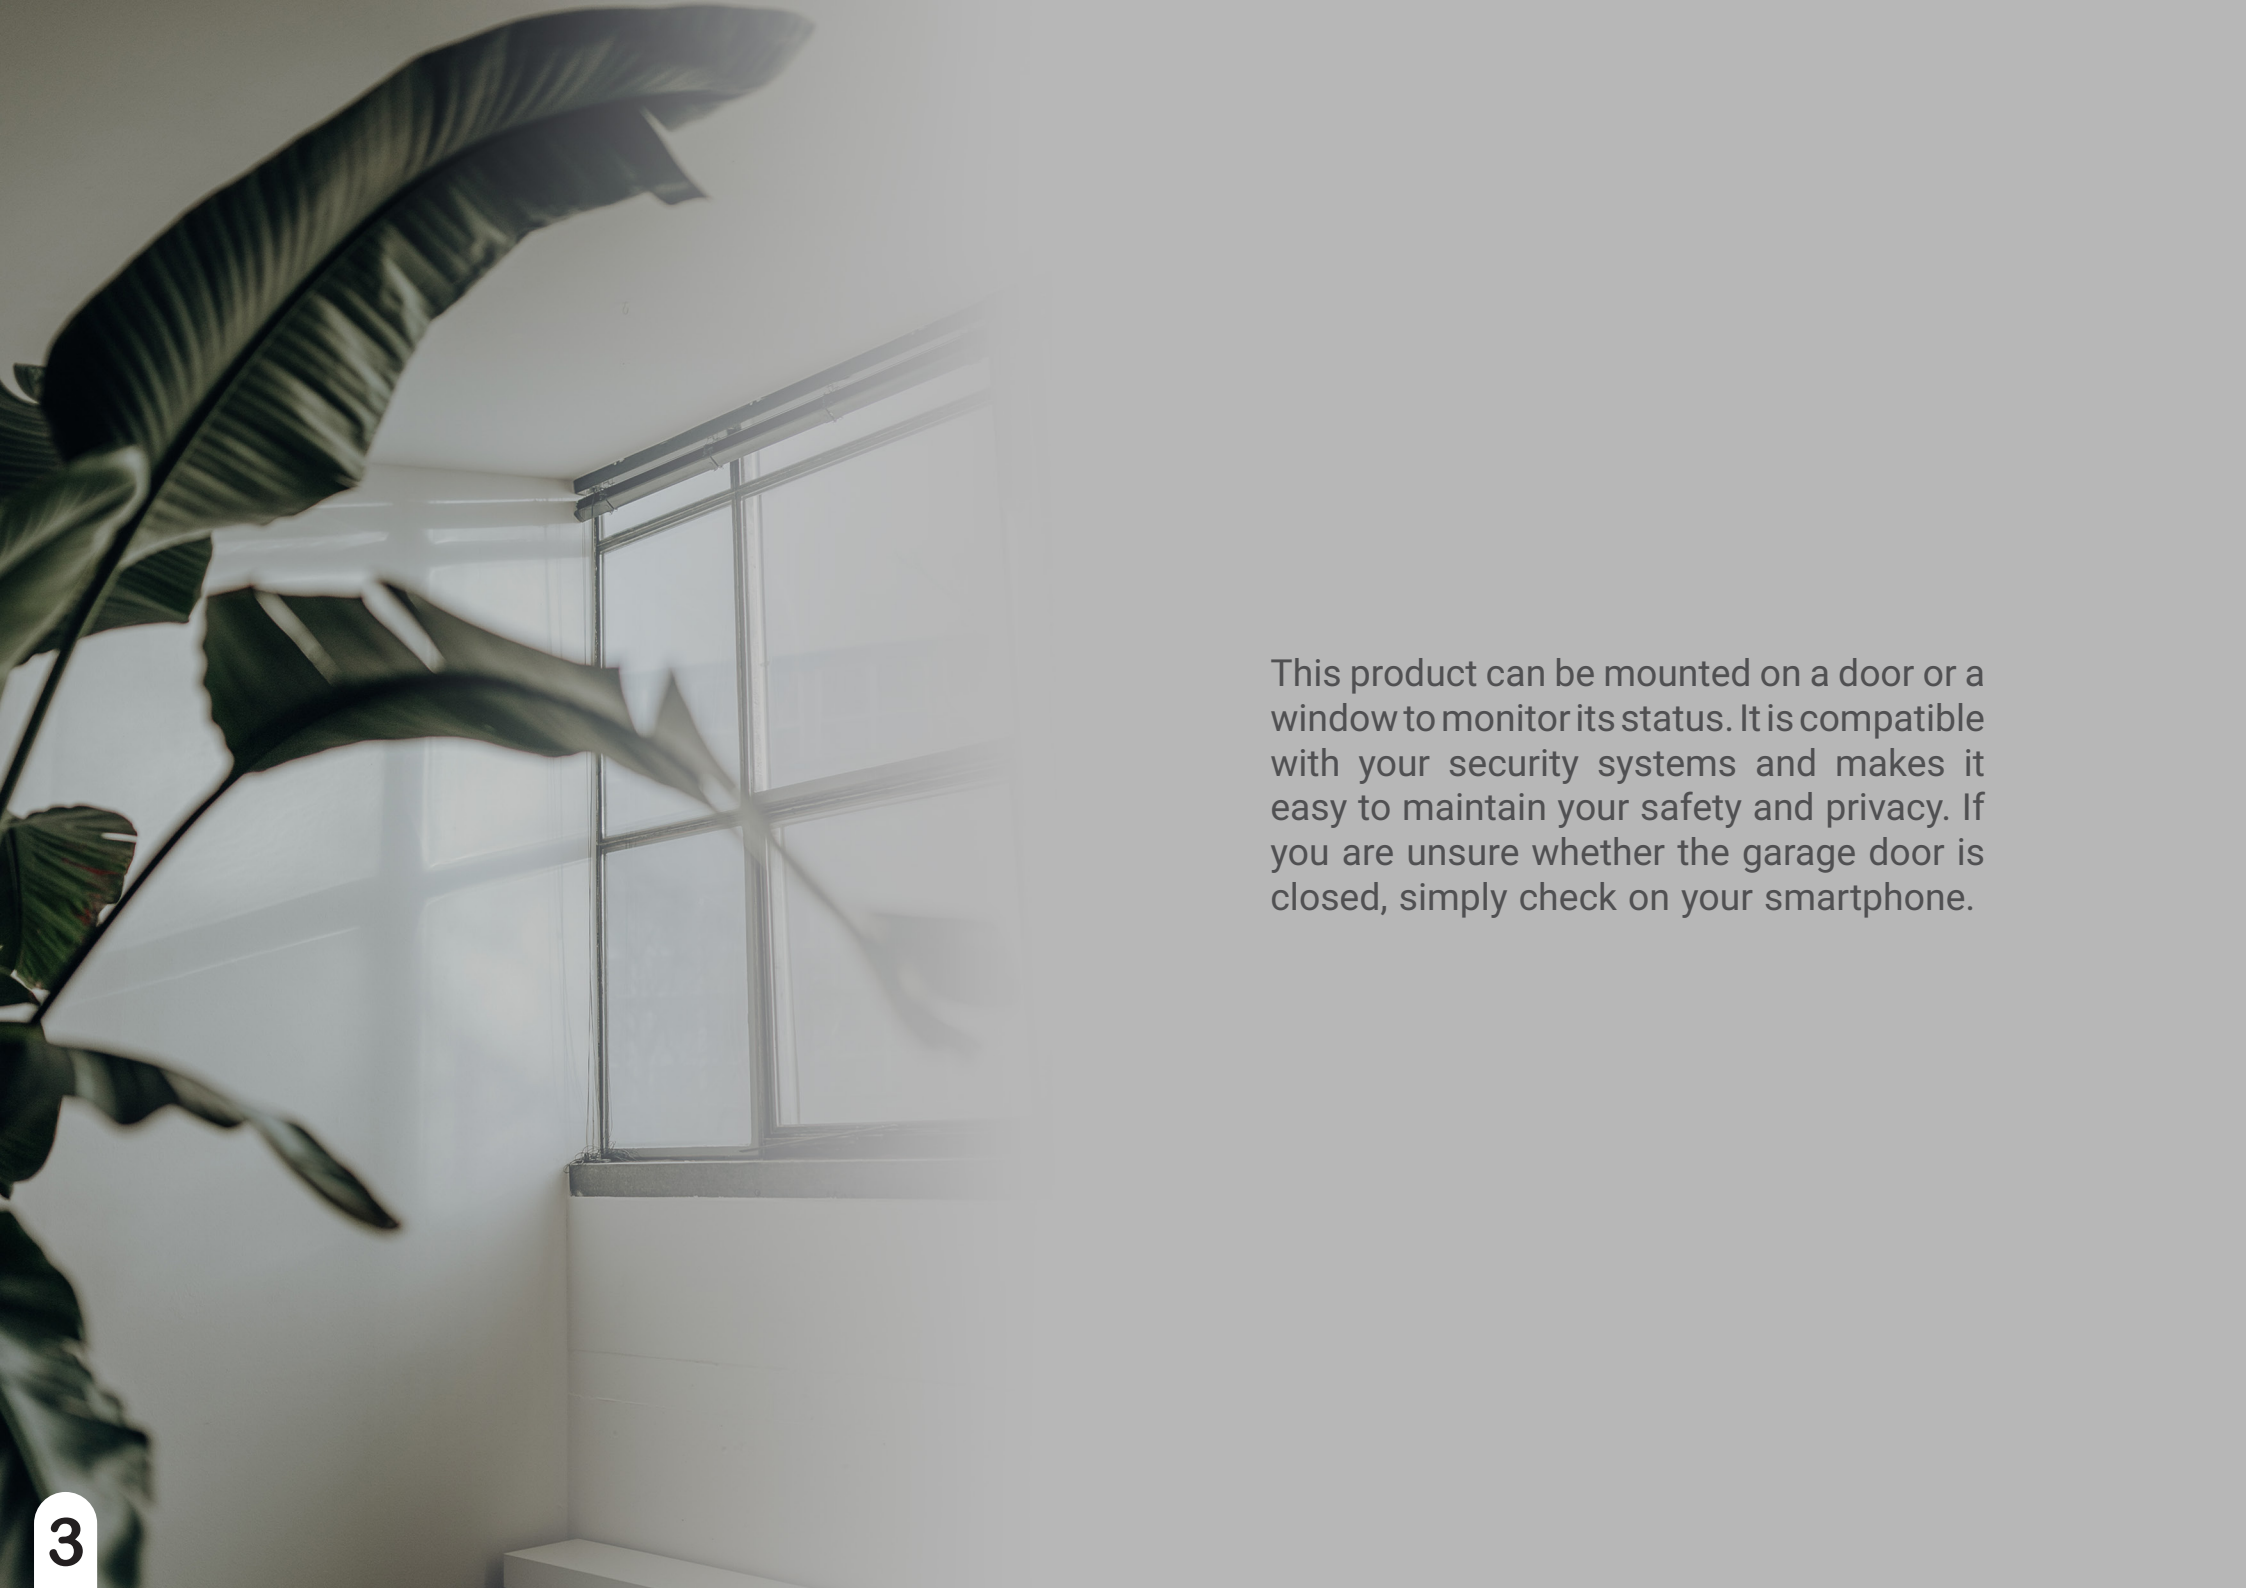

YOUR SHORTCUT TO A SAFER HOUSE

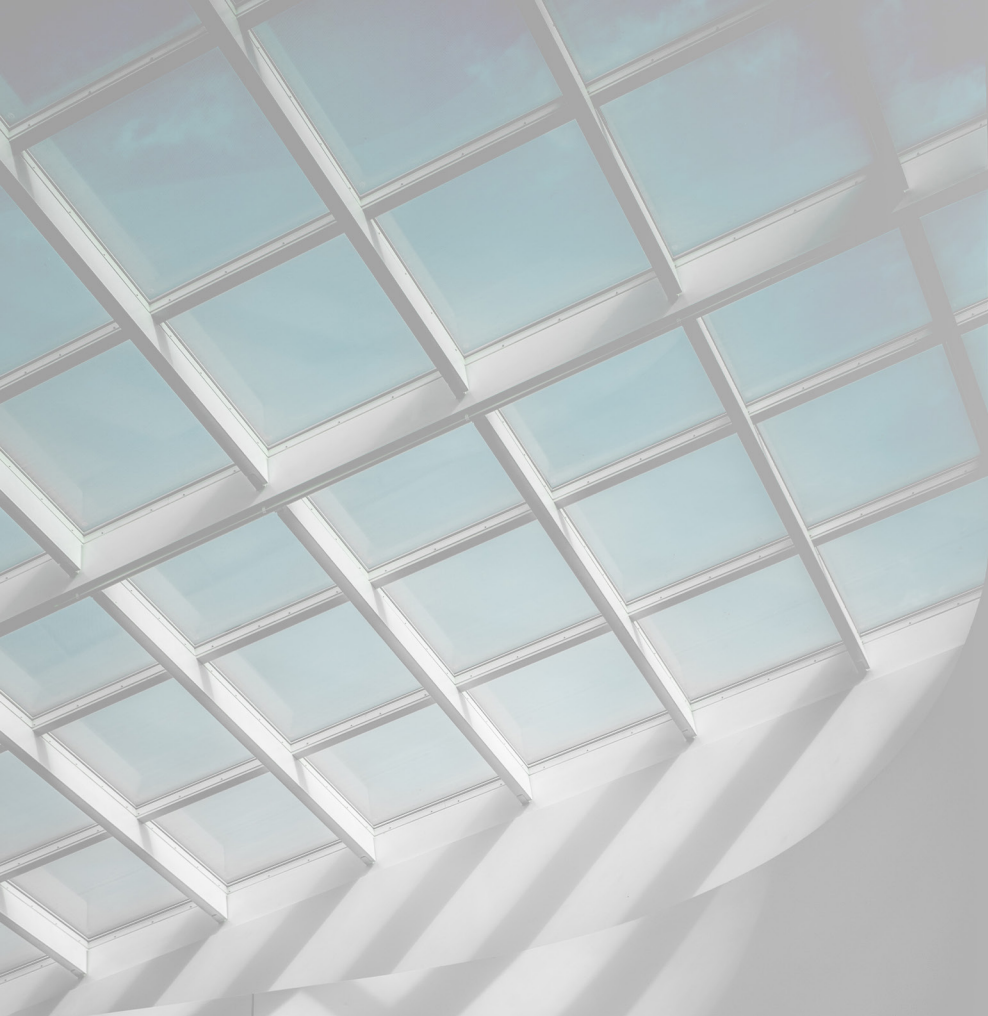

The magnetic door sensor is not a new concept. They have been around for ages, helping to manage the opening and closing of doors and windows for property security systems. As time has gone by, they have become more evolved and user-friendly.

Since TIS Control Ltd. feels obligated to meet users' needs with up-to-date solutions, we have mixed our technology with the Zigbee 3.0 protocol and manufactured a magnetic sensor for doors and windows.

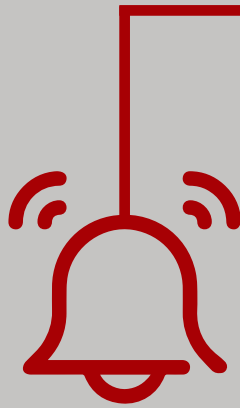

This product can be mounted on a door or a window to monitor its status. It is compatible with your security systems and makes it easy to maintain your safety and privacy. If you are unsure whether the garage door is closed, simply check on your smartphone.

For more advanced performance, integrate this sensor with other security solutions and create a stronger net. If, for instance, the balcony door is open, you will be notified at once since this sensor is on-guard 7/24. So, the next time you're going away, simply enable the Armed Mode on this magnetic product and leave your property with ease of mind.

The only thing you need to do is use its adhesive tape to stick it on doors and windows. Then, you are all set to enjoy the stable operation and high reliability of this sensor. With wide-angle protection, this sensor is perfect to use in homes, apartments, offices, hotel rooms, garages, and more.

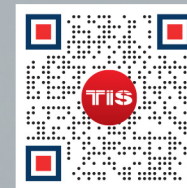

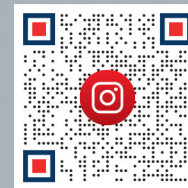

If you still have doubts about whether or not this is the right sensor for you, just know that cable-free installation, a loud alarm, notification triggering, a durable battery, and high applicability are among this product's most beneficial features.

**Trust us,  
and let us  
enhance  
your home  
security  
with our  
simple yet  
functional  
solutions.**
