

# Certified Smart Lighting for Smart People —

TIS-BEE-DIM-1-FL

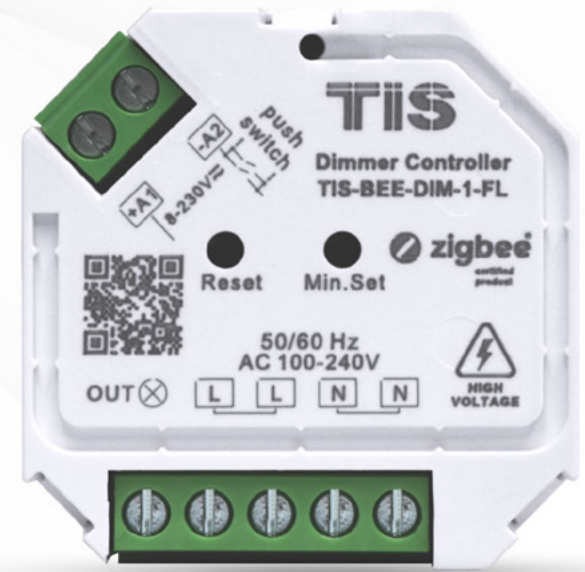

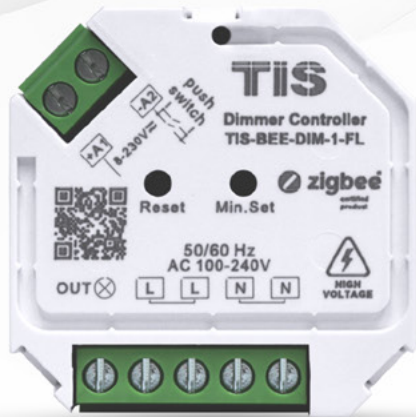

Are you looking for a simple solution to make your home lighting a bit more convenient to control? Are you tired of looking for a dimmer that can cover all types of lights? Then you have come to the right spot! Our offer is the universal Zigbee-certified Dimmer Module, an easy-to-use technology that is suitable for 90% of all dimmable LED lamps.

If you already have a smart hub, simply integrate this module with other solutions and create an even more harmonized home space wherein all light switches, whether old or new, become intelligent. This way, without spending a fortune, you can modernize the atmosphere to match your new furniture simply by replacing old switches in your living room with this dimmer.

Voice control is another feature of this product that enables you to adjust light intensity using just your voice. With our smart dimmer module, it is always ok to say how you feel! Tune the lighting based on your mood and set its adjustment speed.

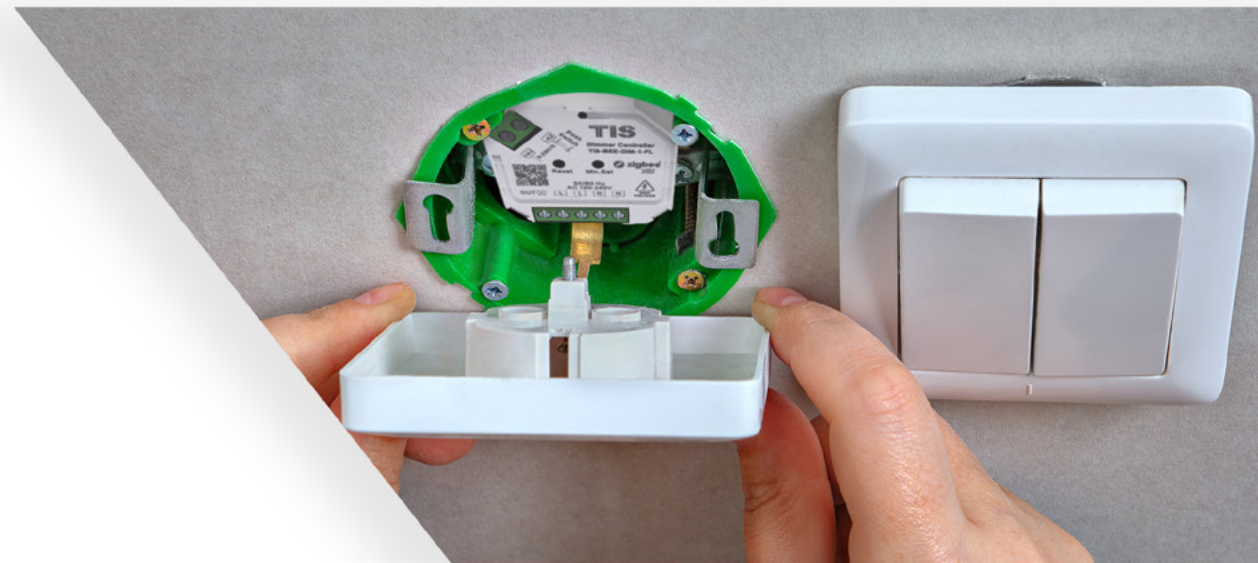

Whether it's the halogen lights in the hallway, the study lamp on your desk, or the chandelier in your dining salon, this dimmer switch is compatible across a variety of lighting options and provides optimal dimmability and light stability.

The good news is that this dimmer is suitable for most frames. You can conveniently fit it in a standard flush-mounted box or on the ceiling and start dimming lights using your smartphone in no time!

Even if you have to leave for work early in the morning, you can still light up the bedroom with a nice pink shade on your wife's birthday and surprise her via your smartphone.

Protection against overload and interference signals are among the other features of this beneficial dimmer that make it perfect for use in homes, offices, restaurants, cafes, and more.
