OUR MILESTONES

TIS FOUNDED

CEO BIOGRAPHY

Growing up, Turath Mazloum was raised to value energy efficiency and treating our world's limited resources with special consideration. After studying computer engineering, he decided it was time to start his own smart home solutions business and he has worked on developing innovative energy-saving appliances ever since.

TIS Control Limited was founded in 2012. With manufacturing facilities in Australia and China, as well as a growing network of distributors across the globe, TIS Control is well-positioned to deliver its cutting-edge products worldwide. Mazloum's goal is to pave the way toward smart climate resilience and a more energy-conscious world.

Turath Mazloum

“ Energy not only powers our lives every day, but it's also the engine that drives economies and determines a country's international success. That is why energy, despite its reliability, should not be taken for granted. If we do not conserve energy, increasing global warming will result in hurricanes, floods, and other disasters that devastate the planet and cost governments and people billions of dollars.

”

OUR PROMISE

TIS Control products combines comfortable living and energy savings without compromising on style and convenience. We can help you gain awareness of your energy consumption and keep track of your daily usage. Thanks to smart sensor technology, our products can save up to 50% percent of your annual energy consumption. Our entire range of products can be easily accessed and remote-controlled with your smart phone or tablet and is compatible with iOS and Android operating systems.

Our product portfolio is manufactured under one roof to ensure the best solutions for lighting, air conditioning, motorization, appliance control, security, saving energy, sensors, timers, audio video, hotel guest room management, energy metering, weather station, BMS, access control, intercom, irrigation, alerting, and smart software and applications.
